How to change the permission of a file/folder from Plesk

1. Login to Plesk control Panel.
2. Select the desired domain from "Domains" tab.
3. Click on "Files" tab.
4. Select the desired file/folder by expanding the '+' icon.
5. Click on the Permission of the desired file/folder.
6. Select the desired permissions.
7. Click "OK" button.
