## How to retrieve plesk password from windows plesk command prompt ?

To retrieve the password in the command line, you can use the "-nogui" option:

```
"%plesk_bin%\plesksrvclient" -get -nogui > plesk_password.txt
```

After that, you can find the retrieved Plesk password in the plesk\_password.txt file.

Eg: notepad plesk\_password.txt

Unique solution ID: #1160
