## How to upgrade ASP.NET v2 to V4 in windows 2008 server.

1. Login to server.
2. Download Microsoft .NET Framework 4 web installer package.  
(<http://www.microsoft.com/en-in/download/details.aspx?id=17851>)
3. Run the web installer file.
4. After completing installation, reboot the server.
5. Login to Plesk panel.
6. Select 'Server components' from 'Tools and settings'
7. Select the option 'Refresh components'.
