How to Create / Delete an FTP Account in cPanel

How to Create / Delete an FTP Account in cPanel

Create FTP accounts:

1. Login to cPanel.
2. Click the FTP Accounts button in the Files section.

3. Fill up the details asked.

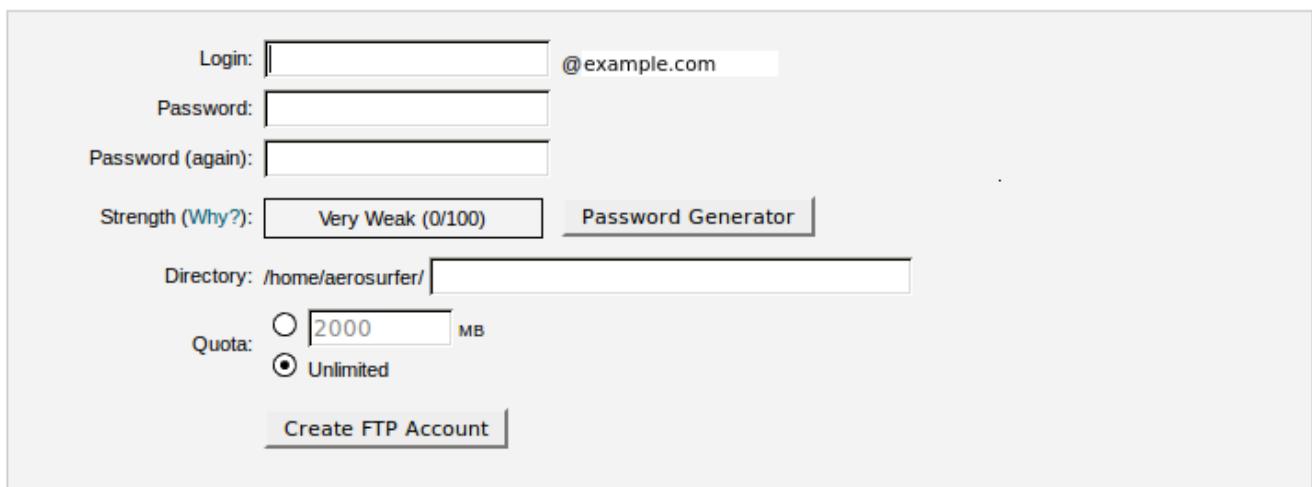

Login: username of the new FTP account

Password: password for this FTP account

Directory: auto-filled by default - public_html/login. You can change it to the required one.

Quota: disk space quota for the FTP account

Add FTP Account

A screenshot of the 'Add FTP Account' form in cPanel. The form contains the following fields and options:

- Login: A text input field with a placeholder '@example.com' to its right.
- Password: A text input field.
- Password (again): A text input field.
- Strength (Why?): A dropdown menu showing 'Very Weak (0/100)' and a 'Password Generator' button.
- Directory: A text input field with the value '/home/aerosurfer/'.
- Quota: A radio button next to '2000 MB' and a radio button next to 'Unlimited'.
- Create FTP Account: A button at the bottom of the form.

4. Click "Create FTP Account"

Web Hosting

Delete FTP accounts:

1. Login to cPanel.
2. Click the FTP Accounts button in the Files section.
3. Click "Delete" to delete the corresponding FTP account.

FTP Accounts
