

Web Hosting

Protocols and Port Numbers for various Email Client Configuration

The port numbers you set determine the protocol your email uses.

IMAP (Non SSL)

IMAP (SSL)

POP3 (Non SSL)

POP3 (SSL)

1) POP3 & SMTP settings with SSL

SSL Type : SSL/TLS

POP3 - Port 995

SMTP - Port 465

2) POP3 & SMTP settings with Non SSL

SSL Type: None or STARTTLS

POP3 - Port 110

SMTP - Port 587 or 25

3) IMAP & SMTP settings with SSL

SSL Type : SSL/TLS

IMAP - Port 993

SMTP - Port 465

4) IMAP & SMTP settings with Non SSL

SSL Type: None or STARTTLS

IMAP - Port 143

Web Hosting

SMTP - Port 587 or 25

You can check if a port is opened or not for your server in the following link by entering your server hostname/IP and port number:

<http://ping.eu/port-chk/>
