

Web Hosting

SPF records to be used in Bytehouse

Simple

```
"v=spf1 +a +mx -all"
```

When bytehouse antispam used

```
"v=spf1 +a +mx a:mailers.bytehouse.co.uk -all"
```

When bytehouse antispam & bytehouse exchange used

```
"v=spf1 +a +mx a:mailers.bytehouse.co.uk include:spf.serverdata.net -all"
```

When bytehouse antispam & bytehouse merak used

```
"v=spf1 +a +mx a:mailers.bytehouse.co.uk ip4:93.91.23.159 ip4:188.191.154.26  
-all"
```

Custom SPF record matching our requirements could be manually created using the tool <http://spfwizard.com>
