## Steps to Buy Resources From Control Centre

To buy resources from the control centre, please take the following steps:

- 1) Log into the control centre at <https://control.bytehouse.co.uk>
- 2) Select the tab "Home" --> under 'Store' there are two options

**Buy Resources:** This screen lets you change the current Quality-of-Service parameters of your Subscription. You can type new values of QoS parameters into the New value fields. Note that if the newly entered values exceed the included value (see in the Current Value fields), then you will have to pay for additional resources in accordance with the price per additional resource unit set by HSP (see in the Price per additional field).

**Buy More Services:** This is where you buy additional Packages, Services & Plans
