

Web Hosting

Steps to Install and configure Watchdog in Plesk.

1. Login to Plesk control panel as admin user.
2. Select "Tools & Settings" from the left pane.
3. Select "Updates and Upgrades" from the option "Panel".
4. Login with root credentials of the server on the new tab that opened.
5. Select "Add Components".
6. Expand "Additional Plesk extensions" and select "Watchdog" and click "Continue".
7. An email notification will be sent when the installation is completed.
8. Now go to modules on control panel >> click on Watchdog.

Here you can enable/disable watchdog for particular service.
